

Capability Statement

Seeds of Genius specializes in developing and delivering **enterprise architecture solutions** to meet the needs of Federal, State and Local governments as well as commercial customers. With an engineering staff certified by Oracle/Sun Microsystems, Novell, Microsoft, Red Hat, Symantec, Suse, CA, Cisco, HP, Hitachi, Brocade, IBM, VMware, EMC, RSA, and more, we execute enterprise architectures that adhere to the Federal Enterprise Architecture (FEA) standards. We have in place the partnerships, industry certifications, reseller agreements and the technical expertise to deliver customer defined IT solutions to exacting specifications.

Our highly trained and certified **Tier 1 through Tier 4 Help Desk engineers** also operate a 24x7 Help Desk, and they have extensive expertise in the multi-vendor arena to support heterogeneous configurations.

Corporate Profile

Established in 2004, we are a **SBA-certified small, woman-owned business** headquartered in Columbia, MD.

In 2009, Seeds of Genius received 4th place on the CRN list of Fast Growth Companies, experiencing 427% growth over the past 3 years. With roots in the training environment, our focus is on the importance of total solution usability and client independence, as evidenced by our extensive technical writings available on www.seedsofgenius.net and www.facebook.com/seedsofgenius.

What sets Seeds of Genius apart from the competition

- We are focused on creating **customer-specific solutions** driven by challenges and opportunities facing our clients.
- All customers have a **dedicated technical and sales team** that work together to design, procure and integrate solutions to customer specifications.
- Our engineers are highly qualified to **resolve complex integration issues** with bringing multi-vendor software, storage, and servers together in any environment.
- We are a **strong system integrator and reseller**, capable of leading you through the IT present and into the future.
- We **deliver only fully tested and certified configurations** and technologies to support our clients' business objectives with flawlessly executed solutions.

Core Competencies

We SIMPLIFY...

through **System Integration** by linking hardware and software systems physically, functionally and efficiently.

We FORTIFY...

your knowledge base by providing a 24x7 global **Help Desk** to provide information and assistance to troubleshoot hardware, software and operating systems issues.

We UNIFY...

your environment through **Virtualization** by creating a consolidated environment for optimal hardware, software and operating systems ROI.

We PROTECT...

your data and IT infrastructure through our expert **Storage, Back-Up & Disaster Recovery** processes.

We SOLIDIFY...

your IT infrastructure by providing critical, fully tested **Hardware, Software & Services** customized to support your organizational processes.

Our Solutions and Service Capabilities

Product Sourcing and Delivery

- DODIIS Trusted Workstations
- Enterprise Software
- Network Components
- Servers
- Storage
- Technical refresh analysis and deployment

Data Center Technology & Operations

- Architecture and Assessment Services
- Consolidation & Virtualization Services
- High Performance Computing
- Implementation & Migration Services
- Installation Services
- Network Management
- Services-Oriented Architecture Design

Information Security

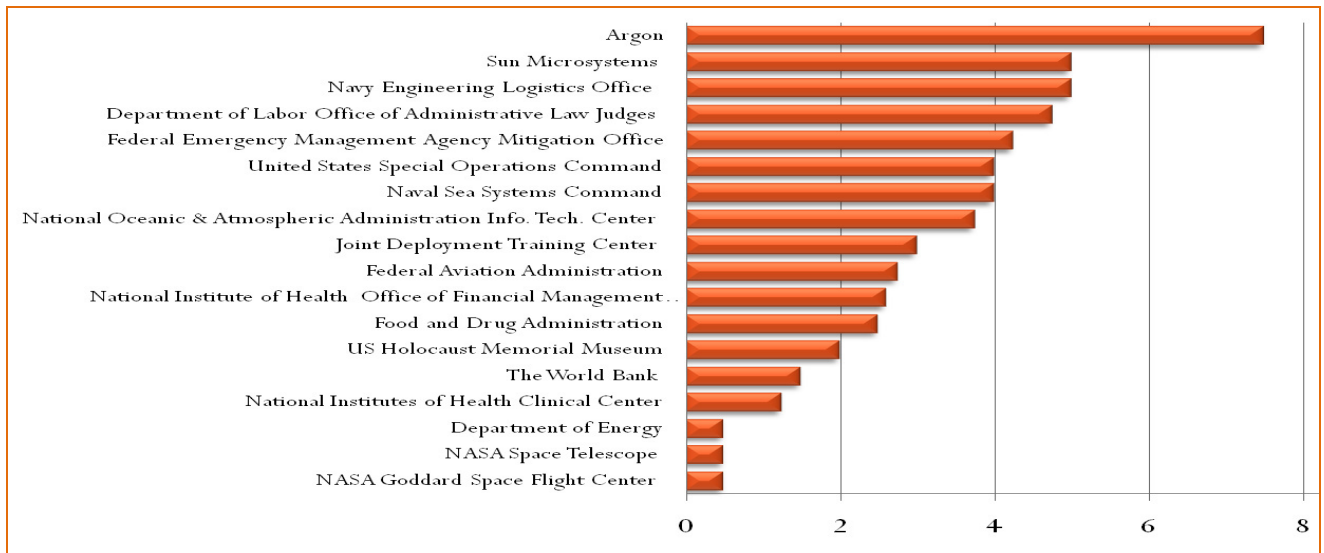

- Certification and Accreditation
- Identity Management
- Independent Verification & Validation
- Risk Assessment
- Security Policy Development
- Top Secret Cleared Personnel

Enterprise Storage Solutions

- Design, install, and support turn-key mission-ready solutions in DAS, NAS, and SANS.
- Modernize storage infrastructure to minimize security risks, maximize storage performance and usage, and comply with FEA standards.

Customers and Years with Seeds

Our **customer-centric focus** has enabled us to build many long-lasting relationships with our clients.

Our Contracts and Buying Vehicles

- DHS - First Source
- DISA- ENCORE II
- USAF – NETCENTS
- NASA – SEWP IV
- DHS - Eagle
- GSA - Alliant GWAC
- NIH - ECS3
- NIH - CIO-SP2i
